Professional Summary

Results-driven Full-Stack Software Developer with 2+ years of hands-on experience building scalable, responsive web applications and modern UI/UX solutions. Proven expertise in Next.js, React.js, Node.js, Laravel, Python, and MongoDB, with demonstrated success in delivering production-ready applications for direct clients. Strong background in both front-end and back-end development, containerized deployments with Docker, and API development. Skilled in Figma for UI/UX design and wireframing. Committed to writing clean, maintainable code and delivering solutions that drive measurable business value. Available for remote work, relocation, and freelance projects.

Technical Skills

Front-End: Next.js, React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, ShadCN UI, Responsive Design

Back-End: Node.js, Express.js, Laravel (PHP), Ruby on Rails, Python, RESTful APIs, C#, C++

Database: Supabase, MongoDB, PostgreSQL, MySQL, Firebase

DevOps & Tools: Docker, Git, GitHub, Vercel, CI/CD Pipelines, AWS (Basics), Postman, Render

UI/UX & Design: Figma, Canva, Wireframing, Prototyping, User-Centered Design, SEO Optimization

---

Professional Experience

Rooche Digital

Software Engineer | Part-Time | Jan 2025 – Present

- Architected and deployed 10+ responsive, production-grade web applications using Next.js, React.js, Laravel, and Ruby on Rails with seamless front-end and back-end integration
- Integrated Supabase for real-time data synchronization, authentication, and cloud storage, reducing backend development time by 40%
- Optimized database queries across MongoDB, PostgreSQL, and MySQL, improving application performance by 35%
- Implemented CI/CD workflows using Vercel for automated deployments and global content delivery
- Developed Python automation scripts for internal tooling and backend processes
- Designed intuitive user interfaces using Figma and applied modern UI/UX principles to increase user engagement by 25%
- Executed comprehensive SEO strategies resulting in improved search engine rankings and organic traffic growth

Quickstore

Full-Stack Developer (Locker Management System) | Full-Time | Jul 2024 – Aug 2024

- **Single-handedly designed, developed, and deployed** complete end-to-end locker management solution as sole developer
- Engineered Android mobile application using Java and Kotlin for locker control and user access
- Built comprehensive admin dashboard with Next.js integrated with Supabase for authentication, real-time database management, and cloud storage
- Implemented real-time features for locker usage tracking, status monitoring, and access control
- Independently delivered functional MVP within 1-month timeframe, managing all aspects from design to deployment

Jeonsoft Corporation

Software Developer | Full-Time | 2023 – 2025

- Built and maintained scalable web applications using React.js and Ruby on Rails, ensuring optimal front-end and back-end performance
- Optimized complex SQL queries in MySQL and PostgreSQL, enhancing system efficiency and reducing load times by 30%

- Applied UI/UX best practices using Figma and Canva to create engaging, user-friendly interfaces
- Implemented SEO strategies that improved website visibility and organic search rankings
- Collaborated with product managers and designers to enhance product functionality and deliver superior user experiences

Teleperformance

Customer Service Representative | Full-Time | 3 months | 2023

- Provided exceptional customer support, efficiently resolving inquiries and technical issues
- Maintained professional communication during challenging customer interactions
- Contributed feedback to improve internal processes and service quality standards

Startek

Customer Service Representative | Full-Time | 3 months | 2023

- Delivered high-quality customer support with focus on issue resolution and customer satisfaction
- Applied empathetic approach to handle diverse customer needs and concerns
- Provided actionable insights to enhance service delivery processes

EverBilena Cosmetic

Warehouse Picker / Stockman | Full-Time | 2022 – 2023

- Accurately processed daily orders for customer fulfillment and retail distribution
- Managed inventory organization and stock rotation to maintain optimal warehouse efficiency
- Coordinated receiving, verification, and storage of incoming deliveries per company standards
- Maintained warehouse cleanliness and safety compliance
- Collaborated with team to consistently meet daily fulfillment targets and deadlines

Education

Adamson University
Bachelor of Science in Computer Engineering (Undergraduate - First Year)

KodeGo BootCamp
Full-Stack Web Development Certification | Feb 2023 – May 2023

- Built full-stack projects using React, Next.js, Node.js, and PostgreSQL
- Developed RESTful APIs for seamless client-server communication
- Enhanced problem-solving abilities through hands-on coding challenges and team collaboration

---

Featured Projects

Zentry Workforce Management System

Tech Stack: Next.js, Supabase, TypeScript, ShadCN UI
Live Demo: zentryx-workforce-management-system.vercel.app
Test Credentials:

- Admin: Username: `David` | Password: `weaktipe345`

- Employee: Email: `lelouch45v@gmail.com` | Password: `D@dweaktipe`
  (Note: UI for all features is complete; some backend functionalities are in active development)

- **Independently designed, developed, and deployed** comprehensive workforce management platform as sole developer

- Built complete HR management system including employee onboarding, records management, and performance tracking

- Developed automated payroll processing system with attendance integration and salary calculations

- Created web-based employee monitoring system with screen tracking, eliminating need for desktop applications

- Implemented inventory management module for asset tracking and resource allocation

- Built time tracking system with clock-in/clock-out functionality and timesheet management

- Designed real-time analytics dashboard for HR insights and workforce metrics

- Crafted modern, intuitive UI from scratch using Figma and ShadCN UI component library

- Delivered fully functional demo with separate admin and employee portals for comprehensive testing

Carpenter Mike Portfolio & Business Website (Client Project)

Tech Stack: Next.js, Tailwind CSS, Vercel
 Live Site: carpentermike.com

- Designed and developed responsive portfolio website for direct client showcasing carpentry services
- Implemented SEO optimization strategies to improve local search visibility
- Created custom contact forms and service showcase sections
- Delivered pixel-perfect responsive design across all devices

Supra Arc Architecture Firm Website (Client Project)

Tech Stack: Next.js, Tailwind CSS, Vercel
 Live Site: supraarc.com

- Built professional website for architecture firm showcasing projects and services
- Implemented image galleries and portfolio sections with optimized loading performance
- Applied modern design principles to reflect brand identity
- Integrated contact and inquiry forms for client lead generation

Astraeus Tech Landing Page

Tech Stack: Next.js, TypeScript, Tailwind CSS
 Live Site: astraeus-tech.vercel.app

- Designed and developed modern tech company landing page with engaging animations
- Implemented responsive design ensuring optimal viewing across all devices
- Optimized page performance achieving 90+ Lighthouse scores

Quickstore Locker Management & Admin Dashboard

Tech Stack: Java, Kotlin, Next.js, Supabase

- Built Android mobile application for locker control and access management
- Developed web-based admin dashboard for real-time monitoring and user management
- Integrated Supabase for authentication, database operations, and cloud storage
- Delivered complete end-to-end solution with mobile client and web admin panel

Central Hub Communication Platform

Tech Stack: Next.js, Supabase, Vercel

- Developed unified communication system integrating email, SMS, and real-time chat
- Implemented user role management, audit trails, and comprehensive message logging
- Deployed production application on Vercel with automated CI/CD pipeline

Task Management Application

Tech Stack: Next.js,Supabase, React

- Designed and implemented collaborative task tracker with real-time synchronization
- Built intuitive drag-and-drop interface for task organization
- Integrated Firebase for authentication and real-time database updates

---

Certifications & Training

- Full-Stack Web Development Certificate – KodeGo BootCamp (2023)
- UI/UX Design Essentials – Online Training (2023)

Additional Information

- Currently delivering full-stack solutions for direct clients with proven track record of successful project delivery
- Open to remote positions, relocation opportunities, and commission-based freelance engagements
- Experienced UI/UX Designer skilled in creating user-centered interfaces with Figma and modern design systems
- Passionate about continuous learning and staying current with emerging web technologies
- Proficient in modern development ecosystem: Next.js, React, Supabase, MongoDB, PostgreSQL, Python, Docker, Vercel
